## General instructions for cleaning and care

### no. 82 Carpet (synthetic fibre)

#### Information about the flooring

Wetrok AG cannot accept any liability for damages due to improper use.  
For security information, see the safety data sheet at [www.wetrok.com](http://www.wetrok.com).  
Wear the required personal protective equipment (PPE): e.g. protective gloves, safety goggles, work shoes.  
Follow the information and remarks on the label, product data sheet and material safety data sheet.  
The product data sheet describes the product and gives information about its application, storage. See [www.wetrok.com](http://www.wetrok.com).  
The recommended colours of pad and brushes consist to the actual wWetrok product range.  
Follow the special cleaning and care instructions of the floor manufacturer.  
The cleaning and care instructions are recommendations and suggestions and apply to floorings in object quality.

**Acetate, jute, camel hair, silk and wool, among others, are alkaline sensitive.**

**Acetate, wool, polyamide, among others, are acid sensitive.**

**Acetate (acetone) and polyacrylic, among others, are solvent sensitive.**

**Remove stains as quickly as possible. Fresh stains are easier to remove than old ones.**

Before wet cleaning, check whether the underside, the backing material and the base material are insensitive to water.

Take care when wet cleaning raised floors and use very little cleaning solution.

Turn off in-floor heating 24 hours before wet cleaning.

Depending on the manufacturing process and the surface, a distinction is made between loop fabric (Reps, Berber, bouclé), cut pile (velour) and needle felt.

The materials used (pile fabric, base material, backing material) determine the system used to clean textile floor coverings.

Distinguishing feature: fire assay: scrape off and set fire to a little fibrous material: wool smells like burnt hair and synthetic fibres melt.

Vacuum textile floors before each cleaning.

Cleaning agents and surface treatments may alter the appearance and properties of a floor's surface.

Test on an inconspicuous spot to find which product is suitable for your requirements.

Test beforehand on an inconspicuous spot to see if the cleaning agent or surface treatment damages the floor.

Dirt-trapping zones, incl. dirt-trapping mats (Wetrok Gardamat) in the entrance, at least 7m long, greatly reduce the amount of dirt tracked into the building.

If you have any questions, please don't hesitate to contact us.
