\* basic treatment / structure: B: coated / C: waxed / D: oiled / E: sealed / F: untreated / G: maintenance care product / H: Disinfection / P: polishing / S: structured / V: heavily soiled

**important:** change pad often.

Use a coin or a key to do a scratch test, to check if all the protective coating has been removed.

When white abrasion occurs, carry out a full clean to remove all the protective coating.

**important:** before protective treatment: the floor must be perfectly stripped, thoroughly rinsed and completely dry!  
 Let dry protection treatment completely between the layers and before use.  
 Process treatment of protection: see descriptions of method.  
 For initial cleaning with maintenance cleaner after protective treatment, see "initial cleaning".

## General instructions for cleaning and care

### no.55 Cork linoleum (not sealed)

#### Information about the flooring

Wetrok AG cannot accept any liability for damages due to improper use.  
For security information, see the safety data sheet at [www.wetrok.com](http://www.wetrok.com).  
Wear the required personal protective equipment (PPE): e.g. protective gloves, safety goggles, work shoes.  
Follow the information and remarks on the label, product data sheet and material safety data sheet.  
The product data sheet describes the product and gives information about its application, storage. See [www.wetrok.com](http://www.wetrok.com).  
The recommended colours of pad and brushes consist to the actual wWetrok product range.  
Follow the special cleaning and care instructions of the floor manufacturer.  
The cleaning and care instructions are recommendations and suggestions and apply to floorings in object quality.

**Strong alkalines can destroy or discolour cork linoleum coverings. Use a special basic linoleum cleaner!**  
**Cork linoleum coverings are sensitive to abrasive pads and brushes.**  
Cork linoleum coverings are largely insensitive to acids, fats, oils and solvents.  
Certain manufacturers give cork linoleum coverings a surface finish at the factory (first maintenance).

Cork linoleum is a 100% natural product consisting of linseed oil, wood and cork granulates, resins, colorants and limestone on a jute underlay.  
Distinguishing feature: fire assay with a glowing hot needle in an inconspicuous place: needle penetrates, typical smell, crater can be removed with the fingers.

Remove loose dirt before every cleaning, damp mop smooth floors and vacuum structured floors.  
Cleaning agents and surface treatments may alter the appearance and properties of a floor's surface.  
Test on an inconspicuous spot to find which product is suitable for your requirements.  
Test beforehand on an inconspicuous spot to see if the cleaning agent or surface treatment damages the floor.  
Dirt-trapping zones, incl. dirt-trapping mats (Wetrok Gardamat) in the entrance, at least 7m long, greatly reduce the amount of dirt tracked into the building.

If you have any questions, please don't hesitate to contact us.  
For training courses, contact the Wetrok Academy, tel. +41 (0)43 255 51 43 or [academy@wetrok.ch](mailto:academy@wetrok.ch).

**Wetrok AG** Steinackerstrasse 62, CH-8302 Kloten, telephone +41 (0)43 255 51 51, [info@wetrok.ch](mailto:info@wetrok.ch), [www.wetrok.com](http://www.wetrok.com).
