

# Filament scrubbing brush

## New floor cleaning technology

Durability and unwavering quality – these are the core characteristics of the Filament scrubbing brush. Get ready for a new degree of flexibility. Whether it be a single disk scrubber or a scrubber-drier for maintenance or intermediate cleaning – the Filament scrubbing brush will deliver an optimal performance for any area of use. A state-of-the-art brush that was designed to allow for contemporary, sustainable cleaning.

**EXCLUSIVELY  
FROM WETROK**

### From application technology straight to the Wetrok product range

Wetrok's capacity for innovation is determined by speed and a particular instinct for new developments and requirements. The Filament scrubbing brush has just passed through the application technology stage and is already an exclusive part of the Wetrok range. Because: Filament is a true novelty in the world of floor cleaning and it is considered to be the synthetic fibre of the future.

### The perfect solution for textured floor coverings

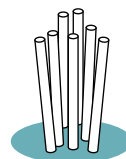

The Filament scrubbing brush is perfect for cleaning smooth or textured floor coverings and safety tiles. With Filament power, entrance areas, school buildings or warehouses are scrubbed sparklingly clean in no time. The Filament scrubbing brush is unsuitable, however, for dry cleaning or cleaning textile floor coverings.

### Gleaming results with Filament

One Filament consists of 19 individual PA 6 bristles that are coated with a layer of PA 6.6. When in use, the fibre tips soon appear to be frayed. However, this is not a sign of wear or poor quality – quite the contrary is true: This is the ideal state for the Filament fibres to store water and to allow for the best cleaning performance possible. And water splashes are prevented, too.

### Filament fibre construction

#### Before activation

Many little fibres are coated and bundled up a rigid Filament layer.

#### After activation

The Filaments are activated within a few minutes of using. In other words: The fibre tips open up to give the scrubbing brush its perfect cleaning power.

# Filament brush: the right size for any machine

- Special design of the Filament bristles, available exclusively from Wetrok
- Optimised water absorption, no splashing
- Suitable for smooth and textured floor coverings

## Good to know – User advice

Please note that the Filament scrubbing brush...

...is not suitable for dry cleaning.

...must not be used on textile floor coverings.

...is available for single disk scrubbers and scrubber-driers.

## Scrubbing brush overview

| Scrubbing brush   | Art. no. | Description         | Size Ø  | Scrubbing brush  | Art. no.   | Description   | Size Ø  |         |
