

Melamine Pad

The highly efficient dirt eraser

Black shoe marks in the hallway – a well-known problem that requires far too much effort. These and other stubborn stains are removed easily and extremely efficiently with the Wetrok Melamine Pad. So even the floors of the most frequented areas such as corridors and entrance areas can be spotlessly clean every day.

But the Melamine Pad is not only a good choice for maintenance cleaning, it is also a valuable companion for intermediate cleaning.

Why the Melamine Pad is different than other pads...

Melamine is a super-strong dirt eraser. Water and the Melamine Pad – that is all it takes in most cases. The consumption of cleaning agents is reduced as a result and so are your long-term costs. After use it only needs to be rinsed briefly with water.

Making microporous floors spotlessly clean...

The Melamine Pad is particularly suitable for microporous surfaces. It is the perfect choice for flooring such as porcelain stoneware, Terrazzo, concrete, uncoated PVC or linoleum. It is unsuitable, however, for strongly textured floor coverings.

Suitable everywhere...

The Melamine Pad is suitable for all machines with up to 350 revolutions per minute. Moisten the pad, fasten the Velcro back to the pad drive disk and off you go for water-only cleaning! The stabilising Velcro back protects the melamine foam from breaking.

For busy areas...

The more frequented an area is, the dirtier it gets. This applies to all rooms, corridors or hallways that are entered by many people every day. With the Melamine Pad you can ensure that the morning state of cleanliness is restored in the evening. Dark shoe markings, traces of everyday life and soiling are easily removed with the Melamine Pad.

Melamine Pad: the right size for any machine

- Super-strong dirt eraser
- For use on microporous surfaces
- Removes the marks of everyday life with ease
- Suitable for all machines with up to 350 revolutions
