\* basic treatment / structure: B: coated / C: waxed / D: oiled / E: sealed / F: untreated / G: maintenance care product / H: Disinfection / P: polishing / S: structured / V: heavily soiled

**important:** before protective treatment: the floor must be perfectly stripped, thoroughly rinsed and completely dry!  
 do not coat impregnated floors.  
 Process treatment of protection: see description of method.  
 For initial cleaning with maintenance cleaner after protective treatment, see "initial cleaning".

## General instructions for cleaning and care

### no.23 Hard xylolite surfacing

#### Information about the flooring

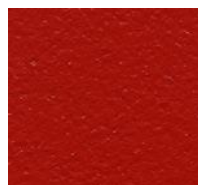

Wetrok AG cannot accept any liability for damages due to improper use.  
For security information, see the safety data sheet at [www.wetrok.com](http://www.wetrok.com).  
Wear the required personal protective equipment (PPE): e.g. protective gloves, safety goggles, work shoes.  
Follow the information and remarks on the label, product data sheet and material safety data sheet.  
The product data sheet describes the product and gives information about its application, storage. See [www.wetrok.com](http://www.wetrok.com).  
The recommended colours of pad and brushes consist to the actual wWetrok product range.  
Follow the special cleaning and care instructions of the floor manufacturer.  
The cleaning and care instructions are recommendations and suggestions and apply to floorings in object quality.

#### **Magnesite is sensitive to acids and lyes. Use a special basic linoleum cleaner!**

Magnesite is sensitive to permanent exposure to moisture and must not be wet mopped for the first two weeks after installation.  
Magnesite is resistant to fats and oils.

Magnesite (stone wood, wood cement) is manufactured from magnesia, quartz powder, wood flour, fillers and oxides.  
Magnesite is an industrial flooring for medium to heavy loads: resistant to wear and highly resistant to pressure.  
Magnesite coverings are cast without joints or with expansion joints, or hand finished, or laid in slabs.

Distinguishing feature: acid assay: apply a little sanitary cleaner to the magnesite covering. Immediately foams up: material damage!

Cleaning agents and surface treatments may alter the appearance and properties of a floor's surface.  
Cleaning agents and surface treatments may alter the appearance and properties of a floor's surface.  
Test on an inconspicuous spot to find which product is suitable for your requirements.  
Test beforehand on an inconspicuous spot to see if the cleaning agent or surface treatment damages the floor.  
Dirt-trapping zones, incl. dirt-trapping mats (Wetrok Gardamat) in the entrance, at least 7m long, greatly reduce the amount of dirt tracked into the building.

If you have any questions, please don't hesitate to contact us.  
For training courses, contact the Wetrok Academy, tel. +41 (0)43 255 51 43 or [academy@wetrok.ch](mailto:academy@wetrok.ch).
