

wetco mop range

Three flexible all-rounders

In narrow corridors or large areas – wetco mops develop their full potential wherever they are used. They guarantee sparkling cleaning results and great versatility. Their solid finishing ensures excellent cleaning results – every time. And best of all: Three models cover the entire spectrum of possible applications.

wetco micro-mop

The glider

400

This mop features optimised gliding properties. That means much less physical effort and easier cleaning. The winning formula: twisted **microfibre** loops. The result: sparkling floors in every room.

Application

Smooth and lightly textured floors

Method

Pre-moistened mop (WetBox system), spray cleaning (spot cleaning)

Properties

Water absorption: ++
Abrasiveness: ++
Dirt absorption: +++
Gliding properties: +++

wetco micromix-mop

The power mix

300

Wetrok experts have puzzled over a mop featuring a perfect blend of **microfibre** and **mixed fibre** for quite some time. The result is amazing. The open-edge outer fringes further improve the already great cleaning power.

Application

Smooth, textured and water-resistant floors

Method

Direct and indirect wet mopping

Properties

Water absorption ++
Abrasiveness ++
Dirt absorption ++
Gliding properties +

wetco flat-mop

The multi-talent

300

No other wetco mop is as versatile as the wetco flat-mop. Its **mixed fibre** makes for a universal multi-talent.

Application

Smooth, textured and water-resistant floors

Method

Direct and indirect wet mopping

Properties

Water absorption: ++
Abrasiveness: +
Dirt absorption: ++
Gliding properties: +

TIP

Wetrok mops with unbeatable durability

You want a mop that offers great cleaning performance and great durability? Our three new Wetrok mops with star qualities are just what you want: www.wetrok.com/news

Mop covers for daily use

Wetrok Quality Label: Quality is now Quantifiable

Can quality be measured? That question was a central issue in the development of Wetrok's new mop range.

Our findings: Once the right criteria are identified, quality becomes measurable. We did just that – and the result is our newly developed quality label specifically for mops.

All our mops undergo benchmark testing for the following criteria: Wash cycle, water and dirt absorbency, gliding properties and abrasiveness.

The quality label offers guidance:

The values stated allow a comparison of the mops.

Find out at a glance, which mop is best suited for your applications.

Overview of mops

Balit

Drewell

Art. No.	Description	Version	Working width in mm
82840	wetco micro-mop 380	V	380
82841	wetco micro mop 560	V	560
82847	wetco micromix-mop 40	P/F	400/450
82849	wetco micromix-mop 50	P/F	500
82852	wetco flat-mop 40	P/F	400/450
82854	wetco flat-mop 50	P/F	500

Designed for

Balit with hook & loop strips (Velcro version = V)
or Drewell (pocket/flap version = P/F)

Good to know – all about microfibre

Did you know that...

... microfibre products should not be used on untreated or oiled wood floors?

... microfibres perform better moist than wet?

... microfibres should not be washed at higher temperatures than recommended, as it will shorten their service life?
