Information about the flooring

Wetrok AG cannot accept any liability for damages due to improper use.
For security information, see the safety data sheet at www.wetrok.com.
Wear the required personal protective equipment (PPE): e.g. protective gloves, safety goggles, work shoes.
Follow the information and remarks on the label, product data sheet and material safety data sheet.
The product data sheet describes the product and gives information about its application, storage. See www.wetrok.com.
The recommended colours of pad and brushes consist to the actual wWetrok product range.
Follow the special cleaning and care instructions of the floor manufacturer.
The cleaning and care instructions are recommendations and suggestions and apply to floorings in object quality.

Most grouts are acid sensitive. Soak the joints well before using acidic cleaners.

Ceramic floor coverings are generally acid resistant.
Sensitive or resistant against acid means against amidosulphuric acid.
Sintered ceramic tiles are relatively insensitive to abrasive pads and brushes.
Do not use wipe and care cleaners in wet rooms and hygiene rooms.
Do not use maintenance products on sintered tiles.
Do not use wipe and care cleaners on sintered ceramic tiles.

Ceramic floor coverings are heterogeneous products made from clay and aggregates such as feldspar and fluorite.
The higher the firing temperature and the longer the time spent in the oven, the denser and more strongly sintered the ceramic will be.
Earthenware: high water absorption (approx. 1,000°C), glazed earthenware: low water absorption (1,300°C).
Slip resistance in commercial areas: classification R9 - R13 (low to very high) and V4 - V10, in bare foot areas A,B,C.

Remove loose dirt before every cleaning, damp mop smooth floors and vacuum structured floors.
Cleaning agents and surface treatments may alter the appearance and properties of a floor's surface.
Test on an inconspicuous spot to find which product is suitable for your requirements.
Test beforehand on an inconspicuous spot to see if the cleaning agent or surface treatment damages the floor.
Dirt-trapping zones, incl. dirt-trapping mats (Wetrok Gardamat) in the entrance, at least 7m long, greatly reduce the amount of dirt tracked into the building.

If you have any questions, please don't hesitate to contact us.
