**important:** For initial cleaning after basic cleaning, see "initial cleaning".  
 Do not coat floors with PUR coating provided in the factory !

## General instructions for cleaning and care

### no 10 Sport floors (PU-sealed)

#### Information about the flooring

Wetrok AG cannot accept any liability for damages due to improper use.

For security information, see the safety data sheet at [www.wetrok.com](http://www.wetrok.com).

Wear the required personal protective equipment (PPE): e.g. protective gloves, safety goggles, work shoes.

Follow the information and remarks on the label, product data sheet and material safety data sheet.

The product data sheet describes the product and gives information about its application, storage. See [www.wetrok.com](http://www.wetrok.com).

The recommended colours of pad and brushes consist to the actual wWetrok product range.

Follow the special cleaning and care instructions of the floor manufacturer.

The cleaning and care instructions are recommendations and suggestions and apply to floorings in object quality.

**Athletic track surfaces and sports field markings are sensitive to scratching. Do not use abrasive pads or brushes.**

**Athletic track surfaces and sports field markings are sensitive to certain solvents, such as ketone, ester and chlorinated hydrocarbon.**

Athletic track surfaces are sealed with a polyurethane lacquer (use-surface) and do not require an additional coating.

Polyurethane athletic track surfaces are seamless, multi-layered, point-elastic and self-coloured floor coverings with a polyurethane smoothing cement as the top layer.

The sports field markings are applied under the transparent use-surface.

Maintenance cleaners must form a non-slip film and should comply with DIN18032.

Remove loose dirt before every cleaning, damp mop smooth floors and vacuum structured floors.

Cleaning agents and surface treatments may alter the appearance and properties of a floor's surface.

Test on an inconspicuous spot to find which product is suitable for your requirements.

Test beforehand on an inconspicuous spot to see if the cleaning agent or surface treatment damages the floor.

Dirt-trapping zones, incl. dirt-trapping mats (Wetrok Gardamat) in the entrance, at least 7m long, greatly reduce the amount of dirt tracked into the building.

If you have any questions, please don't hesitate to contact us.
